

Birds-View: Project Plan Overview

Introduction

Birds-View is a cool new birdwatching app that's going to change the way bird lovers explore, learn about, and share their sightings. It's not just another field guide; Birds-View adds fun elements to make birdwatching more engaging and educational.

App Overview

- **App Name:** Birds-View
- **Build:** AndroidOS.

Description

Birds-View is your go-to birdwatching companion. With a huge database of bird species, real-time sharing of sightings, and fun challenges, this app turns birdwatching into an exciting and educational adventure.

Key Features

1. Bird ID Challenge:

Users can join daily challenges where they identify birds from pictures or sound clips to earn rewards.

2. Leaderboards:

Compete with others on global and local leaderboards based on the number of species you've discovered and shared.

3. Augmented Reality (AR) Integration:

Use AR to spot and identify birds in real-time using your phone's camera for a more immersive experience.

4. Bird Calls Library:

A large library of bird calls is available, with options to record and compare sounds, helping users improve their bird sound recognition skills.

Requirements

User Accounts and Profiles

- Sign up with email or social media.
- Set up profiles with avatars, usernames, and personal info.

Bird Database

- Get detailed info on bird species, including pictures, sound recordings, descriptions, and habitat data.

Bird Identification

- Identify birds by uploading photos or recording bird calls.
- Take part in daily bird ID challenges to earn rewards.

Sharing Sightings

- Report bird sightings with location and date.
- Share sightings in real-time with other users.
- Climb the leaderboards to become a top bird spotter.

Gamification

- Earn points, badges, and awards for identifying birds and completing challenges.
- Unlock achievements by hitting milestones.

AR (Augmented Reality)

- Use AR tech to identify birds through your phone's camera.
- Recognize bird calls using AR features.

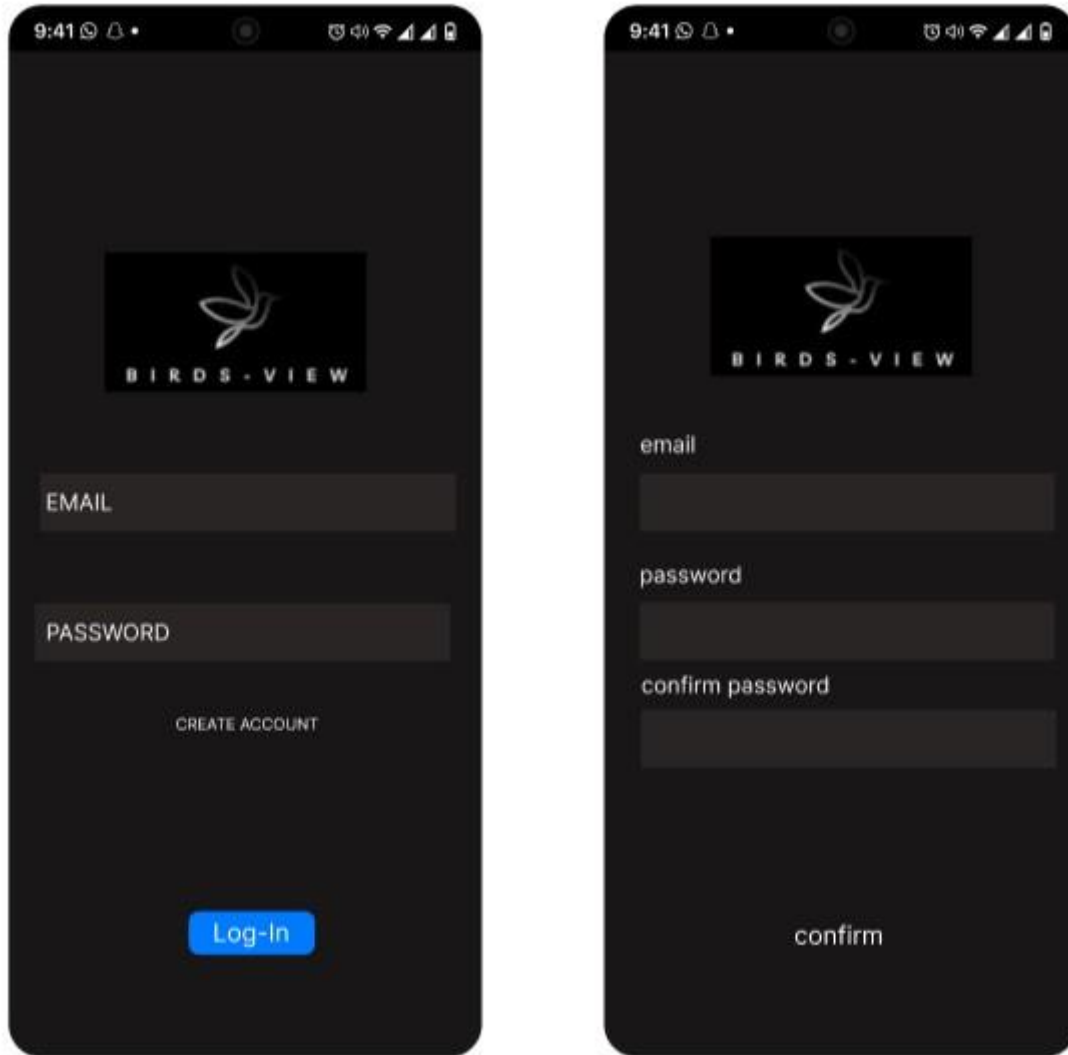

Bird Calls Library

- Explore a collection of bird call recordings with playback and comparison tools.
- Record and upload your own bird calls.

Log-in & Registration Page

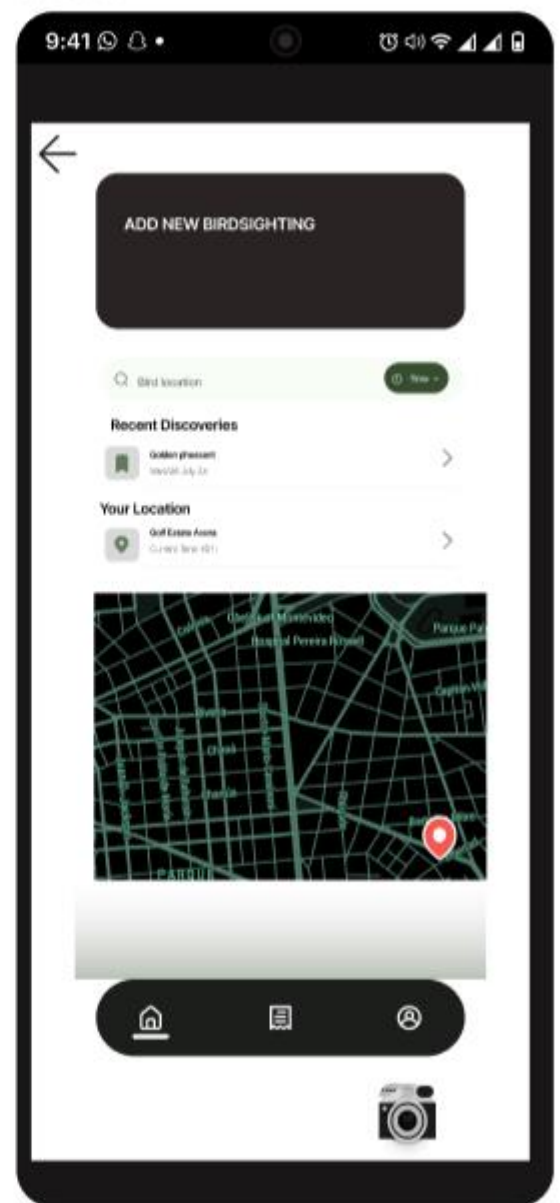

- For creating account and logging in the app

Home & Bird-sighting Screen

Bird sightings/Home Screen

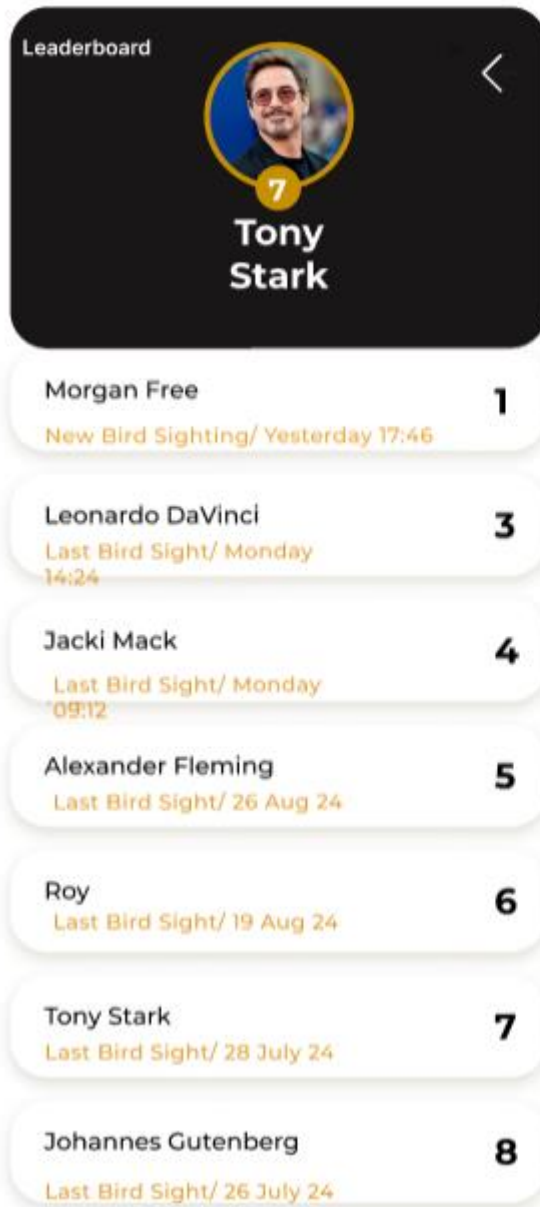

Add New

- Home Screen: Add “New” Sighting, see your history, check the leaderboard and view app
- Bird Sight Screen: Information about the sighting

Leaderboard

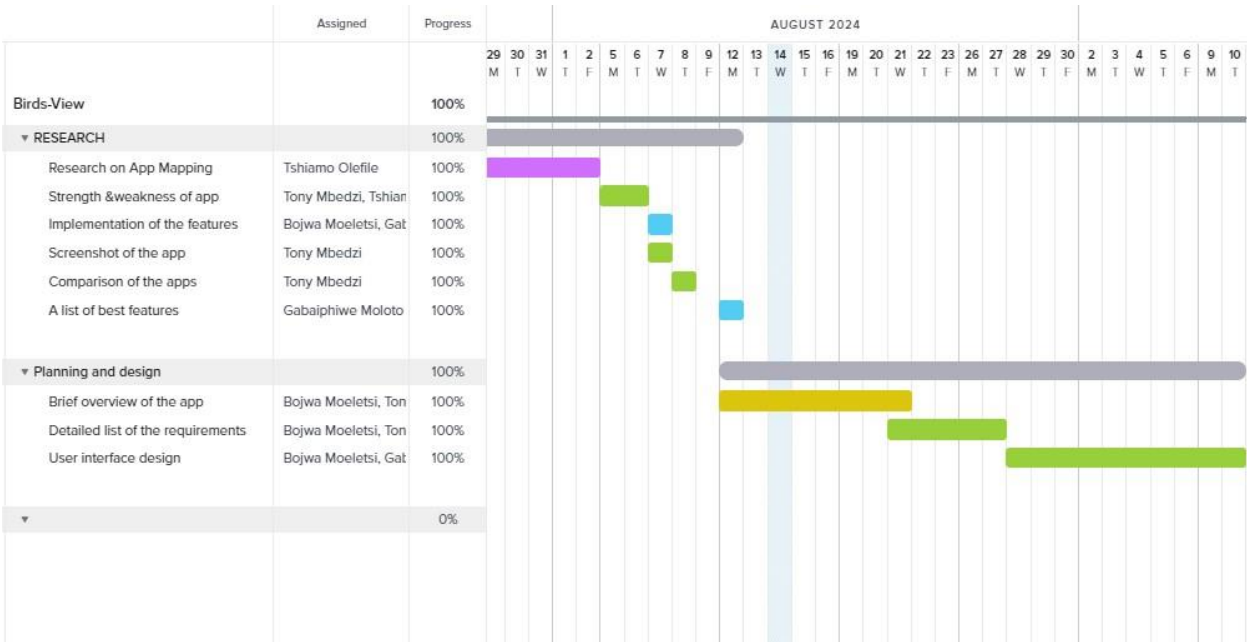

- Leader board Screen: View progress on bird sighting in comparison with other competitors.

Information to Get and Store

- Bird sightings (date, location, and bird species)
- User accomplishments and points
- Bird species database (name, description, images, and audio)

Project Plan & Gantt Chart
